UNU-IAS Fellowship Programmes

Every year UNU-IAS offers PhD and Postdoctoral fellowships to provide young scholars and policy-makers, especially from the developing world, with a multi-disciplinary context within which to pursue advanced research and training that is of professional interest to the successful applicant and of direct relevance to the research agenda of their selected UNU-IAS or UNU programme. The fellows are resident at UNU-IAS in Yokohama or UNU in Tokyo, Japan for the full term of the fellowship. This gives the PhD and Postdoctoral fellows the opportunity to gain from the broader research programme of lectures, seminars, workshops and conferences arranged by the UNU-IAS and UNU. UNU's close institutional links with Japanese affiliated professors and visiting professors from key universities and think tanks in Japan also allows fellows to link into the broader Japanese academic and research community. Since the start of the fellowship programme at UNU-IAS in 1996, more than 160 young scholars, 70% of which from the developing world, have benefited from collaboration with UNU-IAS/UNU and Japanese scholars in this way.

To Apply

An essential part of the application for both the PhD and Postdoctoral fellowships is a research proposal outlining the intended work at UNU-IAS and UNU. Applicants are evaluated on the following criteria:

2008 GLCA Conference on Transnational Feminisms

Kenyon College, Gambier, Ohio, September 26-28, 2008

The internationalization of local feminisms has significantly impacted how, in recent years, research agendas are structured in the U.S. and elsewhere. Feminists from all over the globe are addressing how globalization brings about new forms of gender inequality that, in many cases, are rooted in older histories of colonialism and racism. These transnational approaches move across national boundaries to assess political, economical, and cultural shifts affecting women's lives, and emphasize connections without necessarily creating similarities. Within the U.S., feminists of color who had experienced first-hand race and class biases were the first ones to create a network that included new social movements and transnational alliances.

The exclusion that women of color from different racial, ethnic, physical, national, or sexual identities experienced created the conditions that generated novel coalitional movements. Academic debates have tended to ignore other overarching issues that have produced their internationalization. Local feminisms went global during the 1990s and produced contentious debates over the goals and strategies of feminist politics. These transnational dialogues resist essentialism and universalism and propose theories and methods that go beyond the exclusive focus on gender to make visible other forms of oppression where issues of race, class, culture, and sexual orientation intersect. This conference seeks to engage scholars from various areas of the globe in a dialogue to challenge exclusions and omissions of these debates in mainstream academia and college curricula.
