ANNOUNCEMENTS

SPRING 2008 NEW COURSE OFFERINGS

Medical Anthropology II, Medical Knowledge, Technology, and the Body: ANP 835

Dr. Beth Kangas, W 10:20-1:10, 121 Baker Hall

This graduate-level seminar will examine understandings and practices regarding the body, health, and illness. We will explore how these practices and understandings influence – and are influenced by – medical technologies. Specifically, we will look at case studies of (in)fertility, mental health, and organ transplantation (in Gambia, Egypt, and the United States). Our key questions include: How has the knowledge of biomedicine interacted with “local” knowledges? How have medical technologies been interpreted and customized? What has been considered “knowable”/ “unknowable,” “desirable”/ “undesirable,” and “acceptable”/ “unacceptable,” and why? What have biomedicine and its technologies meant for people who suffer?

Women and Linguistic Politeness: LIN 491

Dr. Troutman, M and W 12:40-2pm, C109 Wells Hall

This course focuses on examinations of linguistic politeness. Students enrolled in the course will examine scholarly work produced on politeness with the main goal of assessing and asserting what Black women do linguistically, particularly as previously unexplored. The course begins with a basic introduction to politeness, based on second and third wave feminisms and interjects a Black woman’s theoretical standpoint as one frame for further examinations of politeness. Students are expected to conduct exploratory research with one aim of generating some answers to the query, “When and where do Black women enter?” Contact Professor Troutman at troutma1@msu.edu for overrides.
