MILLENNIUM DEVELOPMENT GOAL 8: WILL THE WORLD DELIVER?
Speaker: Paul Ladd, United Nations Development Program Program
Wednesday, October 25, 2006
12:00 pm - 1:00 pm, 303-5 Delia Koo International Center
The Millennium Development Goals were created at the 2000 United Nations Millennium Summit, where world leaders agreed to a set of time-bound and measurable goals and targets for combating poverty, hunger, disease, illiteracy, environmental degradation and discrimination against women. Goal 8, to develop a Global Partnership for Development, specifically addresses issues, such as debt relief, access to medicines, and global free trade, which will require a strong commitment from the developed world and global cooperation to achieve. Paul Ladd will question whether the rich world is truly committed to development, and what it will take to deliver on MDG 8.

Paul Ladd is an economist educated in Britain who has served as an adviser on international development for the UK Treasury. In 2006, he joined the United Nations Development Program (UNDP) as an adviser on issues related to ‘inclusive globalization’. Refreshments will be provided by the Visiting International Professional Program.

ANP 892 - Consumer Anthropology. Th 4:30 pm - 7:20 pm
Professors Marietta Baba and Adan Quan (quan@msu.edu)
This course examines consumption from an anthropological perspective, focusing both on contemporary consumer culture in the US, and on the complex spread of consumer
culture around the world. From McDonalds and Walmart (not to mention Mecca Cola and Burger King Muslim) to cell phones and Disney, a rapidly changing consumer culture is increasingly visible worldwide. Anthropological research on consumption tries to make sense of this core element of globalization by connecting consumption to broader cultural and social contexts, and eliciting the consumer’s point of view. One overarching theme in the course will be how consumption is a site for crafting or contesting cultural identities, whether this involves rejecting genetically modified food as a threat to local culture, or using a cell phone to project a modern, cosmopolitan self.
